EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Colin Abrahams on 08/20/2009.

The application has been amended as follows:

On page 9, item d., add the words 'via line 74' between the words 'autoclave' and 'to'.

On page 9, after item d., add the following sentence: "e. the flash vapor is discharged from the feed tank 14 via a line 5."

Claim 34 has been amended to read "A method of leach autoclave processing in an autoclave having a first compartment and at least one subsequent compartment, including the steps, in a desired order, of:

flashing at least a portion of the contents of the first compartment of the autoclave and generating a flash underflow;

performing a solid-liquid separation on the flash underflow to produce a solids fraction and an aqueous fraction;

returning the solids fraction to the first compartment of the autoclave; and

returning a portion of the aqueous fraction to the autoclave."

Art Unit: 1793

Claim 52 has been amended to read: “A leach autoclave processing plant comprising: an autoclave feed tank; an autoclave having a first compartment and at least one subsequent compartment; means to flash at least a portion of the contents of the first compartment of the autoclave into a suitable tank in which a feed underflow can be generated; separation means to perform a solid-liquid separation on the feed underflow from the first compartment of the autoclave to produce a solids fraction and an aqueous fraction; and means to return at least the solids fraction to the first compartment of the autoclave.”

The following changes to the drawings have been approved by the examiner and agreed upon by applicant:

In figure 1, eliminate reference numbers 122, 124, 126, 128, 130, 132, 134, 136, and 138 and their associated directing lines.

In figure 2, draw directing line between reference number 58 and the line immediately to the left of reference number 58.

In figure 2, move reference number 30 and its associated directing line to indicate the line labeled “Process Water” above tank (12).

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

Claims 34, 35, and 37-55 are allowed.

Art Unit: 1793

The following is an examiner's statement of reasons for allowance: While the closest prior art, US 6,451,088 and WO 02/092862 both disclose flashing the autoclave and returning the flash underflow to the autoclave no teaching can be found in the prior art to suggest a selectively flashing the first compartment of the autoclave in conjunction with a solid-liquid separation step and subsequent return of solids fraction and a portion of the liquid fraction to said first compartment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
